

1200mm Aluminium Gate Converter Kit - Pair

Priced from \$48

Easily transform your 1200mm high flat-top aluminium fence panel into a custom-width gate with this DIY converter kit. Designed for panels with 38x25mm horizontal rails, it offers a cost-effective alternative to custom-made gates.

Features:

- Converts standard fence panels into gates up to 1500mm wide
- Compatible with 1200mm high panels featuring 38x25mm horizontal rails
- Simple installation: cut panel to size, insert converters, and secure with included screws
- Pool fence compliant when used with a 1200mm high panel and a gap of 80mm or less between picket edge and inner gate stile edge
- Durable powder-coated aluminium construction
- Includes: 2 converters (left & right) and 4 screws

Note: Hinges and latch sold separately.
