- SPACINGS BASED ON THESE ASSUMPTIONS:**
- Fixed panel installed with fluted wall brackets which produces a 3mm silicone join gap. If wall channel is used, specified opening sizes overlaps, etc will change.
 - Edge of glass door must remain 10mm from wall. 10mm door kalls recommended to use for buffering or if not used, 10mm safety margin gap required.
 - When door is open, minimum 10mm gap is required from wall for safety margin buffering.
- *When using a 650mm wide fixed panel, it is important to purchase 'a slimline wall bracket respectively (STAL-RWBS/ STAL-RWBS-8/ STAL-RWBS-ORD/ STAL-RWBS-NIKI) due to space restrictions between the rail fixing bracket and the wall.*
