

Soudal- CA1400 Chemical Anchor 280ml

Soudal - Soudafix CA1400 (Vinylester) - 280ml Tube

High-Performance 2-Part Anchoring Resin for Heavy-Duty Fixings

The **Soudafix CA1400** is a premium-grade, two-component **vinylester anchoring resin** designed for secure and long-lasting fixings in solid and hollow masonry. Packaged in a convenient 280ml tube, this resin is ideal for structural applications requiring high load-bearing strength.

Engineered for professional use, it's perfect for **fixing threaded rods** into concrete, brick, or stone—making it an excellent solution for **base plate installations** and **facemount spigot fittings**.

Key Features:

- **Fast-curing** formula for reduced downtime
- Suitable for **use in damp or water-filled holes**
- High chemical resistance, making it suitable for aggressive environments
- **No expansion pressure**, reducing the risk of substrate cracking
- Can be used with standard silicone applicators (no special tools required)

Applications:

- Structural anchoring of threaded rods and rebar
- Mounting of base plates, facemount spigots, railings, and heavy-duty fixtures
- Suitable for use in **concrete, masonry, and stone substrates**

Choose **Soudafix CA1400** for reliable, heavy-duty anchoring with superior performance and ease of use.
